

## Iridium Certus from OCENS Breaking the L-Band Status Quo

### Uniform global broadband coverage from Pole to Pole.

Combining lightweight, easy to install terminals with attractive airtime, hardware and satellite-optimized application bundles from OCENS, Certus gives you reliable L-band service for always-on communications – even in inclement weather. Travel safer, no matter how far you go, with complete global coverage.

#### SAFER TRAVELS WITH OCENS

“Just wanted to tell you your services can be lifesavers. Thank you. It’s more than just data you provide.”

- Joan Conover,  
Sv Growltiger

- ✓ Get the fastest broadband speeds, up to 700 kbps, with available streaming IP for VoIP and video.
- ✓ Boost voice quality for business telephony and crew calling.
- ✓ Be ready for GMDSS and get enhanced coverage for the IMO A4 Sea Region starting January 2020.
- ✓ Connect to the low-latency Iridium NEXT satellite constellation, the only solution that provides coverage all the way to the Poles.
- ✓ Access the OCENS suite of satellite-optimized communication apps.

*Because staying connected  
should be easy.*

# Certus – Options and Pricing

More integrated services on an enterprise-grade global network

If you're looking for voice, messaging and high-speed data at high latitudes, either as a primary solution or as a backup to your Aura or V3, the Certus delivers. **Certus is the most advanced L-Band maritime communications service, offering the fastest speeds on the market with guaranteed 100% global coverage.** Perfect for sail and power yachts, trawlers, coastal and high seas shipping.

## More Advanced

Powered by Iridium NEXT, Certus is the next generation of satellite broadband, offering reliable, always-on low-latency connectivity.

## More Flexible

Offers your crew more services with satellite-optimized apps from OCENS and proprietary push-to-talk (PTT) and short burst data (SBD) from Iridium.

## Truly Global

On its own or as a backup to your VSAT solution, Certus provides your crew with the safety and comfort of connectivity all the way to the Poles.

## Right Sized

Small, lightweight and easy to install, with a 15", 18 lb. antenna and a simple 12v DC power connector.

## Faster

Boasting speeds of up to 704 Kbps with simultaneous HD telephone lines for clear, uninterrupted communication at sea.

## Affordable

Low capital costs and a variety of airtime plans from OCENS puts Certus within reach of both year-round and seasonal travelers.

## Bring Your Own Device – BYOD

Allow your crew to use their own smart devices and laptops for:

- Instant messaging, apps and emails
- Surfing the internet
- Social media

## Short Burst Data – SBD

Short burst data services provide fast, efficient data transfer without wasting airtime, facilitating:

- Fuel monitoring
- Engine monitoring
- Cargo tracking

**Get complete global coverage before your next voyage**

Order your Iridium Certus equipment and service at [ocens.com/certus](https://ocens.com/certus) or contact OCENS by email at [sales@ocens.com](mailto:sales@ocens.com) or phone at 206.878.8270.

# OCENS + Iridium Certus

Satellite equipment, airtime, apps, and support to keep you connected.

OCENS keeps you connected, providing the equipment, apps, and support you need from before you leave until you safely return home. With the Iridium Certus global broadband solution from OCENS, **you'll have access to a full suite of satellite-optimized applications that work right from your favorite device so you can connect easier, faster, and with less risk of overage charges.**

## OneMail

[www.ocens.com/onemail](http://www.ocens.com/onemail)

Quickly check your Gmail, Hotmail, Exchange, and other mail accounts over

satellite without the risk of added costs or junk mail delivery.

[www.ocens.com/onemessage](http://www.ocens.com/onemessage)

The only secure, person-to-person satellite messaging app.

## OCENSMail

[www.ocens.com/ocensmail](http://www.ocens.com/ocensmail)

Access email through a dedicated

OCENS mail account and addressing.

## OCENSWeb

[www.ocens.com/ocensweb](http://www.ocens.com/ocensweb)

Web acceleration service enabling web access through satellite connections.

## WeatherNet and WeatherNet Pesca

[www.ocens.com/weathernet](http://www.ocens.com/weathernet)

[www.ocens.com/pesca](http://www.ocens.com/pesca)

The leader in fast, remote access to weather and ocean data worldwide. Also available as WeatherNet Pesca, for Spanish-language access.

## GRIB Explorer for iPad

[www.ocens.com/ige](http://www.ocens.com/ige)

Compressed GRIB delivery and unparalleled visualization tools for your iPad.

## Safer travels with OCENS SnapTrack

### When you "Simply Need a Position"

SnapTrack is OCENS response to the requests of many of our customers for a clean and simple solution to the tracking question. SnapTrack shortens the path from where you are in even the most remote of locations to a screen that captures the 'where' of your wanderings.
